## OIL ONLY ABSORBENT PADS HEAVY WEIGHT (MELTBLOWN)

PRODUCT INFORMATION SHEET

### Overview

SpillSmart Oil Only Pads – Heavy Weight (Meltblown) are high-performance absorbent pads designed to rapidly absorb oils and hydrocarbons while repelling water. Their meltblown construction delivers consistent absorbency and durability for demanding spill response applications.

### Features

- Absorbs oil, repels water
- Meltblown polypropylene construction
- Floats on water surfaces
- Heavy-duty, high absorbency
- Fast wicking action
- Supplied in bales of 100

### Description

SpillSmart Oil Only Pads – Heavy Weight (Meltblown) are engineered for effective clean-up of hydrocarbon spills across both land-based and marine environments.

Constructed using meltblown polypropylene fibres, the pads provide consistent absorbency and structural integrity, making them ideal for handling oil spills, leaks and drips in demanding conditions. Their hydrophobic properties allow them to absorb oil-based liquids while repelling water, enabling them to float and remove hydrocarbons from water surfaces.

The heavy-weight design offers increased durability and absorbency capacity, allowing the pads to perform reliably in larger spill scenarios or ongoing maintenance applications. They are suitable for use as both a clean-up tool and a preventative solution when placed under machinery or equipment.

White in colour for easy identification, the pads also allow users to monitor saturation levels during use, improving control and efficiency.

With strong absorbency performance and a uniform construction, meltblown Oil Only Pads provide a dependable solution for oil spill management across a wide range of industries.

### DESIGNED FOR:

- Marine and waterfront environments
- Oil and hydrocarbon spill clean-up
- Machinery and equipment maintenance
- Worksites exposed to water
- Automotive and industrial applications
- Workshops and warehouses

### SPECIFICATIONS:

- Meltblown polypropylene construction
- Hydrophobic (water-repelling) material
- Absorbs oils and hydrocarbons only
- Floats on water surfaces
- Heavy-weight, high-capacity design
- Fast wicking absorbency
- Supplied in bales of 100
